Attachment to the Notice of Non-Responsive Amendment

After careful consideration of the claims following non-responsive communication is issued.

1) Applicants claims previously directed to the spherical particles specifically comprising PEEK are now oriented to a composition that can be either metallic, ceramic, polymeric, non-polymeric or other inorganic component. The above amendment does not have support in the specification and all claims are considered as containing new matter. Applicants have support for polyether ketone polymers as stated on page 6 of the specification.

2) The way claims can be now be interpreted, as composition comprising two separate fractions, and composition is no longer polymeric powder. This is also considered as new matter

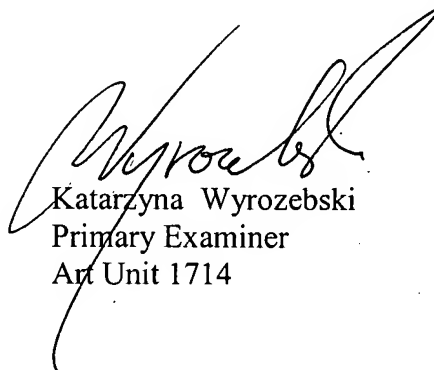

3) The applicants have included method claims, wherein method claims were restricted in the office action dated 10/19/2007. If included in the response to this communication, the method claims will be treated as non-elected by original presentation. In addition in the product by process claims, the patentable weight is given to the product and not to the process by which it is made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Katarzyna Wyrozebski whose telephone number is (571) 272-1127. The examiner can normally be reached on Mon-Thurs 8:30 AM-2:30 PM.
